

8- 22. (canceled)

23 (original) A birdcage attachment in accordance with claim 1, wherein said mounting plate further comprises a positioner on a rear side thereof for positioning the birdcage attachment relative to a birdcage.

24 -62. (canceled)

63. (previously presented) A birdcage attachment in accordance with claim 1, wherein each component is independently rotatable about said support axis.

64. (previously presented) A birdcage attachment in accordance with claim 1, wherein said support axis is defined through a diameter of one of said components.

65. (previously presented) A birdcage attachment in accordance with claim 1, wherein each component is a ring.

66. (previously presented) A birdcage attachment in accordance with claim 6, wherein each component is a ring.

67. (previously presented) A birdcage attachment comprising:
a mounting plate provided with means for mounting said mounting plate to a birdcage;
support arms extending outwardly from said mounting plate and defining a support axis therebetween;
a toy supported on at least two support locations by said support arms along said support axis, said toy being movable with respect to said support arms and said mounting plate, and

wherein said toy further comprises a plurality of concentric components, each of said plurality of concentric components being rotatable with respect to each other about said support axis, and wherein at least one component is disposed within at least one other component so as to rotate within the at least one other component.

68. (new) A birdcage attachment in accordance with claim 1, wherein at least one component is supported by at least one other component.
